

**MATRIX screen** Matrix200(Max Gain 2.0) makes realistic image presentation through color sensitivity, contrast and brightness. It could make people enjoy the picture without hinder of light any angle with any location in cinema.

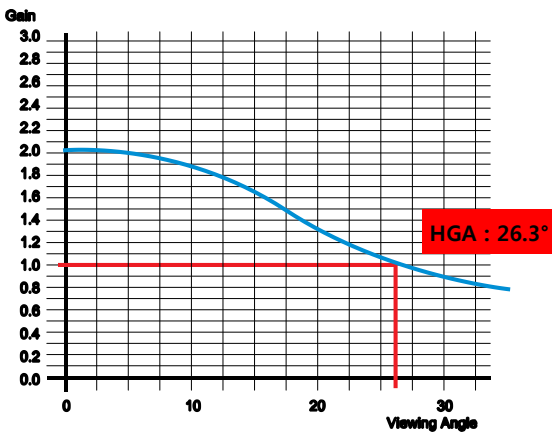

Light itself has no specific color but when it reflects subject and that appears natural color. The lights are reflected in Matrix series, that can be displayed its vividness, brightness and purity.

Matrix series is optimized to enjoy the best picture with natural color sensitivity, brightness and high contrast.

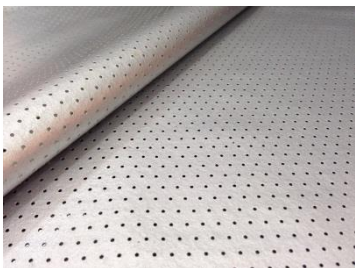

## Application

- MATRIX 200, 240, 300 are not only the most suitable screens for 3D in cinema but for personal as well. In this case, it provides viewers a more lifelike experience and the reality of real depth 3D.

## MATRIX 200

## Standard Specifications

- Non Toxic
- Non Flammable
- Smoke Retardant
- Perforation Density : 4.70%
- Weight : 0.45kg/m<sup>2</sup>
- Viewing Angle : 26.3 °
- Perforation Size : Ø1.2mm
- Color Temperature : 6,200~6,300k

## Maintaining the screen

- Store at temperature between 0°~30°, humidity less than 90%.
- In case, it is exposed on high and low temperature for a long time, it should be set up after warm up with 1~2 days on the room temperature.
- In case of Pearl & Silver screen, it's better not to clean, In case of cleaning the dust of screen shall be removed by soft cloth with warm water.
- Should avoid a screen to be exposed to any liquid of high temperature or any alcohol etc.

**MATRIX screen** Matrix240(Max Gain 2.4) makes realistic image presentation through color sensitivity, contrast and brightness. It could make people enjoy the picture without hinder of light any angle with any location in cinema.

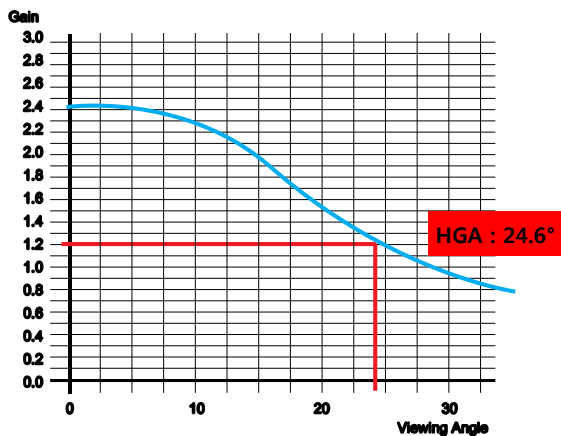

Light itself has no specific color but when it reflects subject and that appears natural color. The lights are reflected in Matrix series, that can be displayed its vividness, brightness and purity.

## MATRIX 240

## Standard Specifications

- Non Toxic
- Non Flammable
- Smoke Retardant
- Perforation Density : 4.70%
- Weight : 0.45kg/m<sup>2</sup>
- Viewing Angle : 24.6 °
- Perforation Size : Ø1.2mm
- Color Temperature : 6,200~6,300k
- Extinction Ratio : 120

## Maintaining the screen

- Store at temperature between 0°~30°, humidity less than 90%.

## MATRIX 300

## Standard Specifications

- Non Toxic
- Non Flammable
- Smoke Retardant
- Perforation Density : 4.70%
- Weight : 0.45kg/m<sup>2</sup>
- Viewing Angle : 22.6 °
- Perforation Size : Ø1.2mm
- Color Temperature : 6,200~6,300k
- Extinction Ratio : 150

## Maintaining the screen

- Store at temperature between 0°~30°, humidity less than 90%.
